SUMMARY

Frontend and Mobile Engineer with 3+ years of professional experience building production web and mobile applications in the fintech industry. Experienced in developing cross-border and local money transfer flows, multi-step transaction forms, user account features, promotional features, and transaction tracking using React.js, React Native, Next.js, TypeScript, and JavaScript. Strong experience integrating REST and GraphQL APIs, implementing authentication flows, managing application state, and handling financial transaction data. Previously worked as a Production Supervisor in manufacturing, bringing additional experience in operational planning, process optimization, and cross-functional coordination.

EXPERIENCE

Software Developer / Frontend & Mobile Developer

Nov 2022 – Mar 2026

PT. Indokoala Remittance

- Developed and maintained production mobile applications for iOS and Android using React Native and TypeScript, focusing on cross-border and local money transfer workflows.
- Built complex multi-step transaction flows with dynamic form validation, transaction state management, and draft persistence.
- Integrated frontend applications with secure transaction APIs and authentication systems.
- Implemented access token and refresh token flows for authenticated user sessions.
- Developed and maintained responsive web platforms using React.js and Next.js.
- Contributed to the frontend development of Transfez.com and other company web platforms as part of a collaborative frontend team.
- Developed user-facing features including account and profile management, promotional and voucher flows, and transaction detail and status tracking.
- Implemented transaction data handling and currency formatting with attention to accuracy and consistency in financial workflows.
- Collaborated with backend developers, product teams, and other frontend developers to deliver and maintain production features.
- Participated in mobile application release processes for both Apple App Store and Google Play.

Production Supervisor

Sep 2019 – May 2022

PT. Indofood Sukses Makmur CBP

- Managed daily production planning and execution in a large-scale manufacturing environment.
- Coordinated production teams and operational schedules to support production targets and operational requirements.
- Led project and operational preparation activities from planning through execution.
- Collaborated across teams to ensure production processes followed operational and quality standards.

PROJECTS

Transfez — Remittance Web Platform | React.js, Next.js, TypeScript, Onelink, Strapi, Tanstack Query

- Contributed to frontend development of Transfez.com as part of a two-developer frontend team.
- Implement LLM.txt and robot.txt for AI and search engine crawling into website
- Link: transfez.com

Transfez App — Remittance Mobile Platform | React Native, TypeScript, Onelink, Strapi, Tanstack Query

- Developed and improved user account and profile interfaces, including verification status, security settings, and user preferences.
- Implemented promotional and voucher interfaces, including promo discovery, eligibility information, minimum transaction requirements, and discount benefits.
- Revamped transaction detail and status tracking interfaces to provide users with step-by-step visibility into money transfer progress.
- Link: [Transfez App](#) (iOS) | [Transfez App](#) (Android)

Goodyear Electrical Motor Dashboard | React.js, PostgreSQL, Nodejs, Sequalize ORM, Bcrypt

- Developed a dashboard for monitoring and managing electrical motor assets.
- Implemented CRUD operations, filtering, sorting, and asset status management.
- Integrated barcode generation and scanning functionality.

EDUCATION

Universitas Gadjah Mada (UGM)

Bachelor's Degree in Agricultural and Biosystems Engineering

2014 – 2019

Hacktiv8

Fullstack JavaScript Immersive Program

2022

TECHNICAL SKILLS

Languages: JavaScript, TypeScript

Frontend: React.js, Next.js, React Native, HTML, CSS

State Management: Redux, Context API

Backend: REST API, GraphQL, Axios, Node.js, Express.js

Database: PostgreSQL, MongoDB, Redis, SQLite

Authentication & Security: JWT, Access Token, Refresh Token, Bcrypt

DevOps & Tools: Git, GitHub, Docker, Azure DevOps, CI/CD

Testing: Cypress, Strix

AI Agents & Agregator: Opencode, ChatGPT 6 Luna

CERTIFICATIONS

TypeScript: The Complete Developer's Guide

Radiation and Protection Officer for Industrial Application Level II

Certificate of Competence – Halal Product Assurance
